

What is Outdoor Burning?

Open, or outdoor, burning is defined by LRAPA as all burning outdoors in open areas, burn barrels, or other make-shift devices.

LRAPA regulates most outdoor burning within the county, with the exception of agricultural burning and forest slash burning. Below is a list of the types of burning that LRAPA regulates. Some require LRAPA-issued permits prior to burning, while others do not.

Burns that require LRAPA-issued permits and fire department authorization

Construction/Demolition/Land Clearing

Burning materials that are generated by removal of debris, logs, trees, brush or demolition materials from any site being prepared for development; wood waste from a construction project; or wood waste resulting from complete or partial destruction of any man-made structure.

Commercial

Burning woody, vegetative, or dimensional wood debris actually generated or used by a commercial operation, including removed and transported materials.

Industrial

Burning waste produced as a direct result of any manufacturing or industrial process.

Bonfires (LRAPA-issued permit required)

Burning materials in a controlled outdoor fire held for celebratory, ceremonial or entertainment purposes.

Burns that DO NOT require LRAPA-issued permits

Residential outdoor burning

The burning of woody yard debris that has been generated in or around a residential dwelling. Regulated on a daily basis. Contact local fire department for permitting requirements. Yard debris transported from property becomes **commercial waste**.

Outdoor BBQ

Burning with a fire that is sized proportionally to the amount of food being cooked.

Recreational fire

Burning a small fire no larger than three (3) feet in diameter and two (2) feet in height, and limited to campfires, fires in chimineas, patio fireplaces, fire pits or other similar devices on private property or in designated areas on public land.

Religious Ceremonial

Burning legal materials in a controlled outdoor fire that is integral to a religious ceremony or ritual.

Note: Not all types of burns are allowed in all areas. See chart for more information. Check with your local city or county office for restrictions in your area.

Burning Requirements

- Attend the fire at all times.
- Follow the daily start and stop burning times.
- Burn only dry, loosely stacked debris, free of dirt, rocks and other non-combustible materials.
- Have water and tools available for controlling or extinguishing the fire.
- Materials prohibited from being burned include garbage, plastics, wire insulation, asbestos-containing materials, automobile parts, asphalt, petroleum by-products, tires, petroleum-treated materials, rubber products, animal remains, or animal or vegetable matter related to any food service or preparation, or any other material which normally emits dense smoke, noxious odors or hazardous air contaminants.

Alternatives to burning

Whenever possible, choose other ways to dispose of yard debris. Chipping, composting and hauling are alternatives. Check with your local garbage hauler about the availability of curbside yard debris pick-up, or call Lane County Waste Management, 682-4119.
